

**PASSIONATE ABOUT
PERSONAL DEVELOPMENT
AND TEACHING
LANGUAGES**

**We created the:
« All-in-One-Method »**

Our training center founded in 2010 became one of the major actors of language teaching in Switzerland.

We propose NLP (Neuro Linguistics Programming) for teaching foreign languages.

It is no longer the learner who adapts him/herself to the teacher and his/her method but the teacher who has to adapt his/her teaching to his/her learner. And that makes the whole difference!

It is with pleasure and ethics that we will study with you the program that will suit better your needs, objectives and availabilities.

**FINALLY BE INTEGRATED IN SWITZERLAND
WITH PLEASURE, ENERGY AND CONFIDENCE!**
A unique method because you are unique

**PROGRAMS ADAPTED TO YOUR SPECIFIC NEEDS
BESPOKE SWISS LANGUAGE & CULTURE LESSONS**

HOW TO BE FASTER INTEGRATED IN YOUR NEW SWISS LIFE ENVIRONMENT!

PRIVATE COURSE À LA CARTE

Each week dedicated to **specific needs of everyday life**, is as follows:

- 2 hours to study the theory, learn the vocabulary, to role-play and prepare the output
- 2 hours, a few days later, on the ground apply
- E.g.: Consumer vocabulary, phrases trading. Transport and travel post office, government and insurance. Language of the human body, medical and emergency. House and craftsmen of the house (plumber, electrician, alarm monitoring...). City and Swiss History. Language of leisure and school.

WORK COLLEAGUES INTEGRATION

These learners often have little time to give to their French course. Upon arrival they must get their bearings and often re-adapt their work habits. They are often overloaded with work duties and are constantly on the move around with meetings, conference calls...

It is therefore important to give them **maximum of flexibility**, so that the French course is not an extra workload, but is a real pleasure.

We recommend a **private course à la carte**. The learner and the teacher organize themselves according to their respective agendas and the learner progresses at his own pace with the teacher focusing on his student's specific needs.

SPOUSES REAL LIFE INTEGRATION

We know that successful expatriation passes through the spouse and their **positive integration** into the new environment. It is indeed them who carry the burdens of the whole family's well being.

It is therefore important to accompany them more closely by helping them in their daily lifes. Our French teachers are transformed into Live-French-Swiss coaches.

The private course à la carte is often favoured because it allows a lot of flexibility on the subjects that are dealt with during the lessons, but also according to the particular schedules that family life imposes on the parents (children naps, school time...).

CHILDREN INTEGRATION

Courses for children are of course adapted to their age and school-life. These children are often enrolled in

These courses can be done **privately or in groups of children of the same age and same level**. We adapt lesson times and duration according to the age of the children.

It is also possible for us to organize **intensive French courses during the summer holiday** along with sailing courses on the lake.
